IMMUNESPACES

ONE PLATFORM. TOTAL SECURITY.

Reimagine how your organization shares, stores, audits, and protects sensitive information.

ImmuneSpaces offers a unified suite of secure, AI-powered solutions tailored for modern teams and compliance-driven industries.

WHY IMMUNESPACES ?

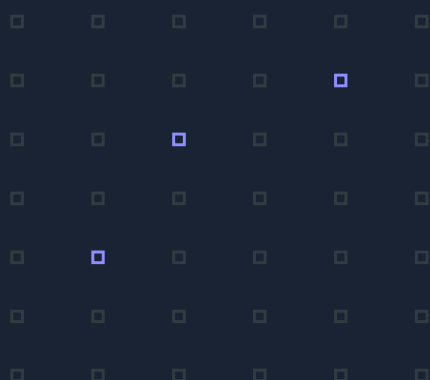

In a world where digital threats evolve rapidly, secure collaboration shouldn't be optional—it should be seamless.

ImmuneSpaces is a complete cybersecurity suite offering encrypted file sharing, secure storage, automated auditing, and AI-based insights—all under one intuitive platform.

Built for teams, trusted by enterprises, and designed to meet global compliance standards.

KEY BENEFITS

-  One platform for all your secure data needs
-  Effortless collaboration, maximum control
-  AI-driven risk mitigation and compliance support
-  Tailored for finance, legal, healthcare and government sectors

IMMUNEVAULT

PROJECT-SPECIFIC ENCRYPTED STORAGE & ACCESS CONTROL.

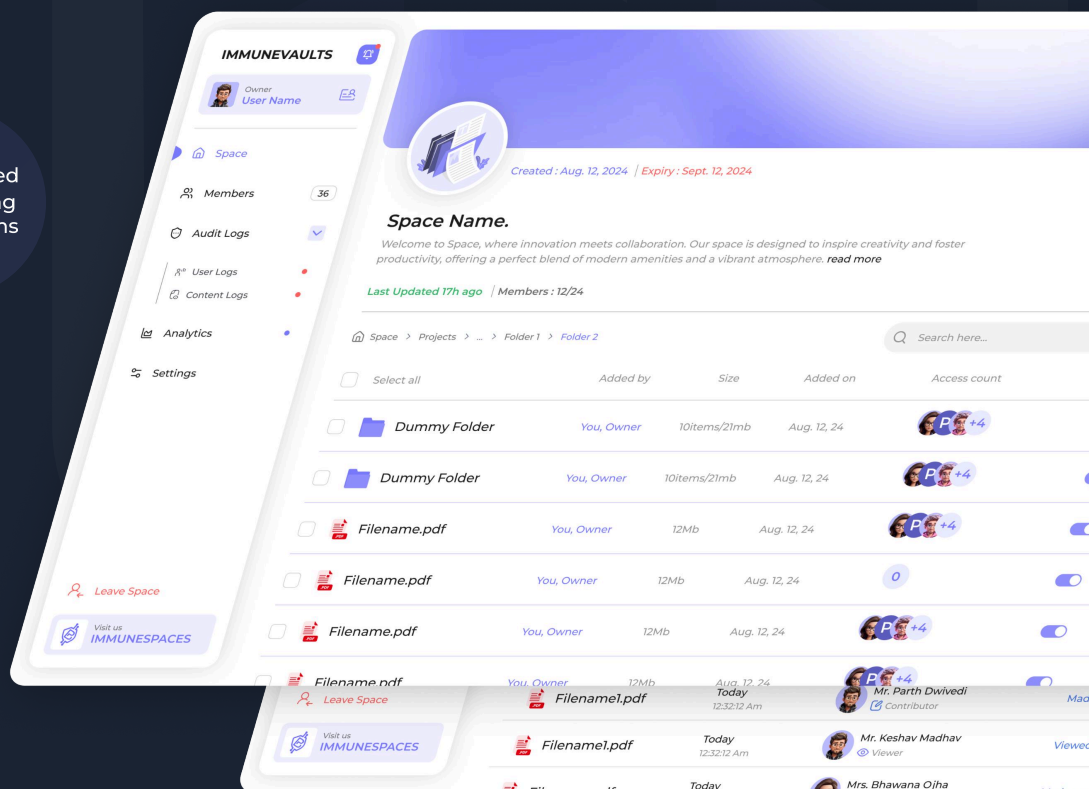

ImmuneVault lets you organize and secure your sensitive project data within separate, encrypted vaults—each with configurable permissions, user roles, and access timelines.

CHALLENGES SOLVED

Leaked files due to improper permissions

Disorganized data sharing across teams

Lack of access traceability

OUR SOLUTION

Folder-level encryption

Role-based access with time limits

View-only & download-blocking modes

Comprehensive activity logs and geo-based restrictions

IMMUNEVAULT

KEY FEATURES

GRANULAR ACCESS CONTROLS

Define who can view, edit, or share files

7-DAY GRACE PERIOD

Restore accidentally deleted or expired vaults

GEO-RESTRICTIONS

Limit access by IP or location

AUDIT LOGS

Track every activity with detailed metadata

SECURE PREVIEW

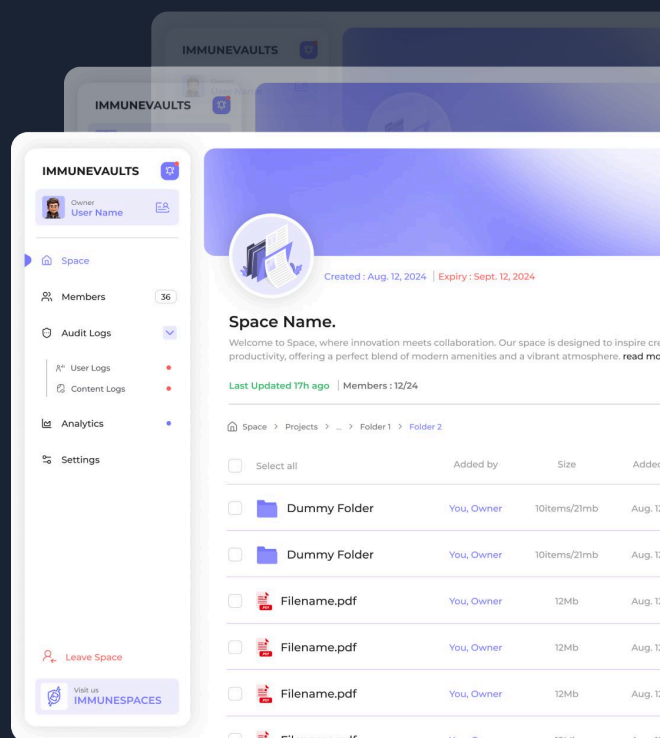

View docs securely without downloads

WATERMARKS & VIEW ALERTS

Visual deterrents and usage notifications

PII REDACTION

Automatically hide sensitive info before sharing

PRUDENTBIT

IMMUNEFILES

SECURE FILE SHARING WITH FULL CONTROL.

ImmuneFiles empowers teams to share files internally or externally with confidence, backed by powerful permission settings, audit trails, and real-time alerts.

CHALLENGES SOLVED

Insecure file sharing via email or untrusted apps

No visibility into who accessed files or when.

Files leaked or misused after sharing

OUR SOLUTION

Password-protected, time-bound links

Real-time access logs and immutable trails

Support for all Office file types (DOC, PPT, XLS, PDF)

Native integrations with Gmail, Outlook, Google Drive, OneDrive, and Teams

PRUDENTBIT

IMMUNEFILES

POWERFUL FEATURES OF IMMUNEFILES

PROCTORED MODE

Detects multiple views and warns instantly

SMART WATERMARKING

Apply user-specific IDs to deter leaks

AI-POWERED ASSISTANT

Use “Veda” to summarize or analyze document content

ADMIN DASHBOARD

Monitor file access across your organization

MOBILE RESPONSIVE

Share, view, or track on any device

AUDIT-READY

Export reports for compliance at any time

PII REDACTION

Automatically hide sensitive info before sharing

ORGANIZE YOUR FILES & FOLDERS

FILE & FOLDER ORGANIZATION

Easily manage files and folders with tags and categories for quick access.

FILE REQUESTS

Request files directly from team members for seamless collaboration.

PII ANALYSIS

Identify the percentage of PII in files or folders for data protection.

ARCHIVE & RETRIEVE

Optimize storage by archiving files with easy retrieval.

AI POWERED INSIGHTS

Chat with AI to extract key information from files.

COLLABORATIVE TOOLS

Secure sharing, version control, and real-time editing for teamwork.

immunefiles.com

IMMUNESHARE

FAST, SECURE & ACCOUNT-FREE FILE TRANSFER.

Need to send files quickly without compromising security? ImmuneShare lets you transfer files instantly with optional expiration, download limits, and password protection.

KEY BENEFITS

-] No signup required for recipients
- 🔗 Sender gets total control over access
- 🕒 Auto-deletion after download or expiry
- 🛡️ End-to-end encryption built-in

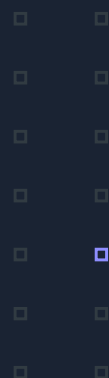

Perfect for quick transactions, legal files, design mockups, and compliance-sensitive assets.

immuneshare.cloud

IMMUNEAI

AI-POWERED RISK DETECTION & PII INTELLIGENCE.

Immuneai constantly scans your digital ecosystem for sensitive information, exposure risks, and compliance issues—before breaches happen.

CHALLENGES SOLVED

Manual identification of sensitive data is error-prone

Rising regulatory requirements (GDPR, HIPAA, etc.)

Lack of visibility into third-party platform risks

OUR SOLUTION

- ✓ Automatically detects PII across your documents
- ✓ Categorizes risk severity levels
- ✓ Connects to Google Drive, Outlook, OneDrive, and others
- ✓ Offers visual dashboards and suggested remediations
- ✓ PII density scores that quantify data exposure levels
- ✓ Real-Time scanning to find sensitive info in seconds
- ✓ Compliance dashboard to view risk by user, file or department
